Here we are dealing with a recession that started in 2000, and the government tortures a company that has created industry, jobs, wealth, and progress. And they have done it because they have good ideas and know how to make them into products. Now does it make any sense at all to punish them for being successful? Stop wasting our time and money on this vendetta and end this case. Do not fall victim to the anti-business forces that drag success to the ground.
